Education

VIT-AP University

B.Tech. in Computer Science and Engineering

Andhra Pradesh, India | June 2027

CGPA: 8.12

Experience

Vectr Technologies Private Limited | Full Stack Developer Intern

Remote | May 2025 - July 2025

- Developed a dynamic **user search and interaction interface** in React Native with asynchronous REST API integration, search-result rendering and loading-state handling.
- Implemented an authenticated **friend-request workflow** using Axios, Node.js, Express.js, Clerk and Prisma, including request validation, error handling and notification integration.
- Developed backend API handlers for form submissions and user interactions, integrating Prisma for database operations and structured API responses.

Projects

Warranty Tracker | TypeScript, React, Express.js, Gemini, Dexie | [GitHub](#)

- Built a full-stack warranty management application for tracking **products, warranties, documents and claims** using React/TypeScript, Express.js and IndexedDB persistence.
- Integrated **Gemini-based receipt analysis** with Zod-validated structured output to extract product, purchase and warranty information from uploaded receipts; documented backend APIs with OpenAPI/Swagger.

Document Summary Assistant | React, Vite, Python, FastAPI, Tesseract, Gemini, Docker | [GitHub](#) | [Live](#)

- Built a full-stack document processing application that accepts **PDF and image files**, using PyMuPDF for PDF text extraction and Tesseract OCR for scanned documents.
- Integrated Gemini to generate configurable summaries and key-point extraction, with the backend containerized using Docker and deployed alongside a Cloudflare Pages frontend.

AI-Powered Customer Support Automation System | Python, LangGraph, LangChain, FAISS, Ollama | [GitHub](#)

- Designed a **multi-agent customer support workflow** using LangGraph to classify incoming requests and route them to specialized departmental agents.
- Implemented **RAG with FAISS, SQLite conversation memory and human-in-the-loop approval** for sensitive requests, with local LLM inference through Ollama.

Skills

Languages: Java, Python, JavaScript, TypeScript, SQL

Frameworks & Libraries: React.js, React Native, Node.js, Express.js, FastAPI, LangChain, LangGraph

Databases & Tools: MongoDB, Redis, SQLite, Dexie, FAISS, Git, GitHub, Docker, Ollama

Leadership & Achievements

Entrepreneurship Club, VIT-AP | Marketing Co-Lead

Sep 2024 - Jun 2025

National Entrepreneurship Challenge 2024-25

Team ranked 17th out of 1,200+ teams nationwide

Certifications

Building Agents with Agentic AI - IBMCE

Additional Experience

SamInsider | Content Writer/Journalist

Remote | Oct 2024 - Dec 2024

DealNTech | Content Writer/Journalist

Remote | Sep 2022 - Present
